JOB DESCRIPTION

Description

Pacific Rim Defense is seeking a **Systems Administrator** FSET based out of Pearl Harbor, Hawaii.

The qualified candidate will serve as embedded support, supporting the Joint & Expeditionary Command and Control (JEXC2) program. Embedded personnel are considered subject matter experts (SME), mission essential and deployable on any Regional Combat Command (RCC) exercises or operations that require the use of C2 Family of Systems. The individual provides on-site technical support at the garrison and deployed locations where the C2 system operates.

Job Responsibilities:

- Work on deployable IT systems that communicate over satellite
- Installation of new hardware or software
- Creating and managing user accounts
- Maintaining computer systems such as servers and databases
- Planning and properly responding to system outages and various other problems
- May include light programming or scripting to make the system workflows easier.
- Training computer users and assistants.

Qualifications

Required Education:

Bachelors and 2 years' experience; Masters and 0 years' experience; 4 years' experience accepted in lieu of degree

Required Certification:

Security+ certification

IAT Level II or above Certification in addition to Security+

Required Skills:

- Familiarity with Windows Server 2012 R2, or newer
- Understanding of Active Directory, Group Policy, and other Windows Roles and Features related to Enterprise services
- Experience with virtualization, i.e. vmWare and ESXi.
- Experience working in a Linux environment
- Experience in a Systems Administrator role
- Security+ certification
- IAT Level II or above Certification in addition to Security+

Required Clearance:

Ability to obtain and maintain a Secret security clearance. A minimum of an Interim Secret clearance will be required prior to first day of employment.

Required Travel:

May include additional travel up to 10%.
